6:30—9:30 PM

This FREE workshop is a collaborative program offered by MiCNU, MAP and MML

6:30 PM Registration and networking

7-9:30 PM Workshop & Networking Reception

Workshop

Synergy between Historic Preservation and Sustainable Construction

Gavin Gardi, LEED AP, CFD, Sustainable Programs Manager, The Christman Company

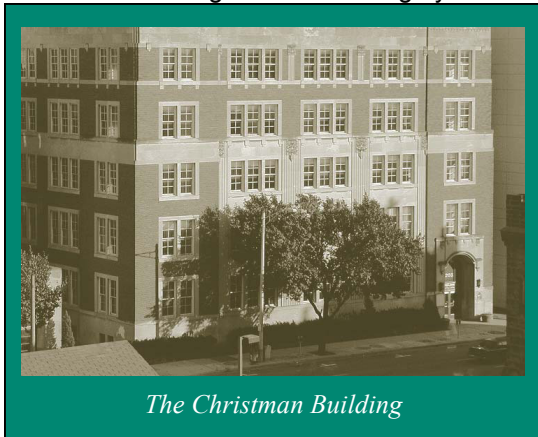

This workshop is a presentation and tour of The Christman Building, the first double LEED Platinum building in the world. As a case study, the session will clearly show the value and economics of integrated design and the synergy that is inherent in existing building reuse, historic presentation and sustainable development. The Christman Building which is partially occupied by The Christman Company national headquarters also provides a “living example” of the benefits of sustainable construction, historic preservation and how the LEED rating system can be used to promote responsible development.

Gavin Gardi

Workshop participants will leave the presentation with an understanding of the economics of LEED, the value of integrated design, reusing existing buildings and how historic preservation works with sustainable construction and the LEED rating system.

The Christman Building is the world's first double platinum LEED certified building. LEED® is the U.S. Green Building Council's rating system for design and construction of the world's greenest, most energy efficient and high performing buildings, with the platinum level being its highest possible rating.

The Christman Building

The building is certified in two categories, Commercial Interiors and Core and Shell. Listed on the National Register of Historic Places, the building is an example of sustainable “green” historic building practices, considered by many to be the highest form of sustainable design and construction due to its reuse of an existing structure. The many green features of the project include water use reduction, optimized energy performance, construction waste management, a focus on daylighting and a healthy indoor environment.

Reception

Featured guest is John Norquist, President and CEO of Congress for the New Urbanism

Speakers:

Terry Sanford, Vice President, MiCNU; **Mayor Virg Bernero**, City of Lansing (invited); **Arnold Weinfeld**, MML Director of Public Policy & Federal Affairs and President, MML Foundation; **John Norquist**, President and CEO of Congress for the New Urbanism (CNU). Mr. Norquist will introduce the National and State Roles of CNU, discuss national CNU initiatives and provide an update on possible changes in urban policy and funding by the Obama administration.

John Norquist
