Council, Oakland County Planning and Economic
Development Services, and Jim Nash, Oakland
County Commissioner, District 15, Farmington Hills*

SEMCOG . . . Local Governments Advancing Southeast Michigan

Southeast Michigan Council of Governments

Sustainable Development for Our Future Economic Success: Oakland County Green Building Workshop

Objective

To learn about sustainable development and how green building can help government, business, and residents save money by conserving energy, limiting infrastructure needs and costs, increasing productivity, and protecting air and water quality.

Learn about

- State and federal programs available to local governments and businesses.
- The U.S. Green Building Council's Leadership in Energy and Environmental Design certification program and how it documents green building practices.
- Oakland County's efforts to encourage sustainable development.
- Efforts to encourage green development in local communities.
- Specific green projects in Michigan and Oakland County.

Background

Sustainable practices have been getting much more attention — but what does it mean? Sustainable practices can impact business and government operations in a variety of ways. It is about energy efficiency and low-impact development, but it is also about improving operating processes to reduce waste and maximize resources.

Registration required

There is no charge for this workshop. Seating is limited, so you are encouraged to reserve a spot by August 28, 2006. Return the reservation form or RSVP to Ken Bishop, SEMCOG Environmental Programs Administrative Assistant, at 313-961-4266. You can also register online at www.semco.org. Find the link to the workshop under Planning Issues on the home page.

For any questions about this workshop, please call Oakland County Commissioner Jim Nash at 248-471-3759.

Workshop Agenda
